

## MicroStrategy Cloud Platform

[How to Create a New Cloud Environment](#) [Managing Active Cloud Environments](#) [How to Monitor Your Environment](#)[How to Start or Stop an Environment](#)[How to Start, Stop, or Restart a Service](#)[How to Schedule Management Activities](#)[How to Resize an Environment](#)[How to Terminate an Environment](#)[How to Run an Automated Upgrade](#)[How to Add Collaborators](#)[How to Modify the Environment Name Link](#)[Advanced Setup Information](#) [MicroStrategy Cloud Platform APIs](#)[How to Change the Interface Language](#)[How to Submit Feedback](#)[AWS Support Model](#)

## How to Start or Stop an Environment

### Starting an Environment

1. From the MicroStrategy Cloud Platform click the  icon under **Actions**.
2. During start up the **State** will display as  Starting.
3. When State displays **Running** your environment is ready.

### Stopping an Environment

1. From the MicroStrategy Cloud Platform click the  icon under **Actions**.
2. During shut down the **State** will display as  Stopping.
3. When State displays **Stopped** your environment is inactive.

If you no longer need your cloud environment, see [How to Terminate an Environment](#)
